DETAILED ACTION

Status of the Claims

Claims 1-11 have been canceled. Claims 12-107 have been added and are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26, 30, 38, 41-43, 58, 62, 66, 70, 73-75, 90, 94, 98, 102, and 105-107 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims do not end with a period as required. The lack of a period renders the claims vague and indefinite, as it cannot be determined what is intended to be included in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-107 are rejected under 35 U.S.C. 102(b) as being anticipated by SWANSON et al (Infect. Immun., 1994).

Art Unit: 1623

SWANSON discloses isolation of 40 kD MOMP from *C. trachomatis*. The reference further discloses the preparation of rabbit antibodies to the MOMP, requiring an injectable composition. See "Materials and Methods" section.

The claims are drawn to N-linked oligosaccharides, compositions comprising said oligosaccharides and a multivalent entity comprising a carrier linked to two or more N-linked oligosaccharides. Applicant admits that the claimed oligosaccharides are derived from this protein. Although the oligosaccharides are not depicted as being N-linked, see for example claim 26, the claims specifically require an N-linkage. Therefore, this isolated glycoprotein, comprising these oligosaccharides, anticipates the instant claims. The protein would also constitute a carrier comprising multiple oligosaccharides, making it a multivalent entity.
